

**PhD Program in Electronic and Computer Engineering**  
**University of Cagliari, Italy**

*Requirements for a*  
*CO-TUTORSHIP THESIS*

Co-tutorship allows PhD students, enrolled at DRIEI or at a foreign University, to prepare their thesis alternating periods of studies at their host University and at the partner University. The thesis will have two advisors, one at the university of Cagliari and one at the foreign University. The thesis will be defended at only one institution and the student that passes the exam will be awarded a joint PhD title.

The following conditions must be fulfilled.

- The student must be regularly enrolled in one of the two PhD Programs.
- The PhD Program Board accepts the co-tutorship.
- A co-tutorship agreement for each student is signed by the Rectors (or Provosts) of the two Universities.
- The research is alternatively carried out at the two Universities under the supervisions of the two tutors, one for each Universities. The total length of the stay in the partner University is between 6 and 18 months during the three years of the program.
- The defence committee will have members of both Universities.
